# Commute Congestion Checker 通勤・通学混雑度チェッカー

For commuters and students

RUSH INDEX SYSTEM

## Check your daily commute with an index.

Just enter the stations for your home and your workplace or school. Three indicators, starting with the Rush Commute Index, show the strain on a meter.

Free · No sign-up | Web | Smartphone app

## 01 WORRY Does this sound familiar?

### 01 Moving soon? Curious about morning crowds

Maps and rents alone do not show how the daily train ride will feel.

### 02 Comparing commutes to a new job or school

The same 30 minutes can feel very different with crowds. Compare them in numbers.

### 03 Making your usual commute more comfortable

Check transfer stations and estimated arrival times to find a steadier morning rhythm.

## 02 INDICATOR Your morning commute, on three meters

### Rush Commute Index®

Our own index that turns commuting strain into a number, based on congestion rates published by Japan's MLIT.

### Ride Load Score

A value that combines your time on the train with the number of transfers.

### Commute Burden Index

A value that combines time and crowding to show the overall burden of your commute.

## 03 HOW TO USE Three simple steps

**STEP1** Enter your home and work or school stations

You can also enter an address or postal code, and choose an arrival or departure time.

**STEP2** Choose a route

Pick from options such as fastest, fewest transfers, or using a paid limited express.

**STEP3** Watch the meters move

See the three indicators, a short message, and estimated transfer stations and arrival times.

## Try entering your usual route.

No sign-up needed. Free on the web and in the app. *Screens are in Japanese.
